Unique Attachment

We learn about analogy and complementarity from the theory of colors, and how color is formed by the interactions between tint, tone, and shade in nature. A colored surface is also perceived differently based on its association with other colors.

Our design for Keda Cloud takes these considerations into account. Infinite combinations are possible with this organic set of colors, which can stand alone or be harmoniously blended together.

A wide range of options for interior and exterior applications, in residential, commercial, work or public spaces.

IT'S
AWESOMELY VARIED
AND MATT FINISH
IS SO DEPRESSED THAT
MAKES EVERY TOUCH
CATCHING.

Inspiring color Tones

In search of the best combination of color and texture, our designers have studied many types of clouds.

After the completion of this work, 13 colors have been selected, each representing an emotional reaction combined with visual perception.

TAKING CARE MADE SIMPLE

We are always concerned about our grandparents getting injured from slipping on wet and algae-ridden floors. At keda, we have created a special kind of matt finish that has anti-slip and anti-algae properties. which will protect your grandma and grandpa from slipping on wet areas We are delighted to introduce the 'Protect surface, developed primarily to save senior citizens from falling and getting injured due to wet floors and algae build-ups.

-  **Anti Slipping Surface**
-  **Frost Resistance**

Along with the materials like water, oil, grease, etc. we have also taken care of the clements created by the environmental conditions, like algae, which makes the surface slippery. Protect surface stops the formation and development of the algae and makes it an anti-algae surface These qualities of the 'Protect' surface make it an anti skid in the true sense.

 **Easy to Cleaning**

Specific Plus Point

-  **Breaking & Bending Resistant**
-  **Stain Resistant**
-  **Slip Resistance**
-  **Thermal Shock Resistant**
-  **Frost & Fire Resistant**
-  **Water Absorption Resistant**
-  **Salt Resistant**
-  **No Discoloration With Exposure To Light**
-  **Frost & Fire Resistance**

Thickness :

Naturele and Matt surfaces

Keda recommends a 3 mm joint for optimal aesthetics taking advantage of the tile's caliber in multi-sized applications. Both cement and epoxy grout can be used; grout-design color matching is advisable for optimal aesthetics. It is not recommended to use grouting with colored pigments in contrast with the color of the tiles.

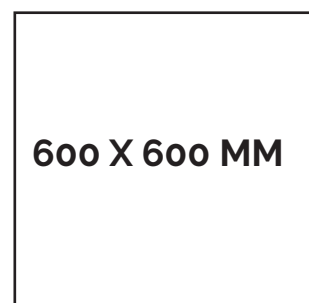

Finish & Thickness :

9 mm solution is an **anti-slip** and **matt finish** normal thickness tiles. Imagine your indoor and outdoor space.
